DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Species I, claims 1-9, in the reply filed on 1/10/05 is acknowledged. The traversal is on the ground(s) that claim 1 is generic to species I, II and III. Examiner agrees with applicant on this issue and will examine claim 1 as being generic to species I, II and III, however, the species requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-9, there is no teaching or suggestion in the art of record disclosing a first and second semiconductor devices biased by a temperature stable output voltage coupled to each other to provide a reference current in accordance to claim 1. Therefore, independent claim 1 is deemed allowable along with its dependent claims 2-9.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 10-20, directed to species II and III is no longer withdrawn from consideration since all of the claims to these species

depend from or otherwise include each of the limitations of an allowed generic claim as required by 37 CFR 1.141.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 5783936, 5793248 and 6121764 disclose current reference structures which are relevant to applicant's disclosure.
